Setting Milestones, Executing Requirements...

Program Management Support

What We Do.

Our approach to program management reflects our ability to coordinate and prioritize resources across projects, departments and entities, ensuring that resources are managed with a global focus.

Program Management Services include:

- Program and Acquisition Strategies
- Contract Requirements Package (CRP)
- Program Documentation Plans and Milestone Doc.
- Program Risk Analysis and Risk Management
- Life Cycle Cost Estimates and Analysis
- Budget Development and Management
- Program Management during all life cycle phases

As a program manager, you want to make sure your program satisfies all milestone requirements and follows a logical progression through a system's life cycle. You also need to tailor milestone requirements to deliver solutions to customers in a timely manner.

Action Technologies can provide solutions, because we have the technical and programmatic experience, capabilities, and tools needed to do the job for all types of programs and for all life-cycle phases.

ACTION TECHNOLOGIES
